

SYSTEM AND METHOD OF UNACKNOWLEDGED NETWORK LAYER SERVICE  
ACCESS POINT IDENTIFIER (NSAPI) RECOVERY IN SUB-NETWORK DEPENDENT  
CONVERGENCE PROTOCOL (SNDP) COMMUNICATION

5

ABSTRACT OF THE DISCLOSURE

A system and method of unacknowledged Network Layer Service Access Point Identifier (NSAPI) recovery in Sub-Network Dependent Convergence Protocol (SNDP) communication are disclosed herein. The disclosed techniques prevent the loss of data which may result from changing between GPRS/GSM modes in a Class B  
10 mobile station (MS).
